# LACIE OVERVIEW

Through a combination of cutting-edge engineering and a rich 17-year history of unique design aesthetics, LaCie has earned an excellent reputation for producing solutions that are the perfect synthesis of form and function. Our hard drives, optical drives, displays, and accessories are created to enhance and expand your computing environment, no matter its platform or configuration.

Featuring the exclusive styles of world-renowned designers such as Neil Poulton, Ora-İto, Karim Rashid and Porsche Design GmbH, LaCie's award-winning products look stunning and perform with unparalleled reliability and versatility.

LaCie is a global leader in manufacturing top-of-the-line tools that are often first-to-market, constantly raising the bar and re-establishing industry standards.

# LACIE MOBILE

LaCie has the full range of Mobile drives.

The Rugged drive which is built to handle the toughest conditions with a metal case and shock resistant rubber coating, available up to 160GB

The LaCie Biometric drive is the ultimate in data security with its finger print reader your data cannot be accessed without your permission

The colourful LaCie brick is stackable for expanding storage capacity, this lightweight drive is available up to 160GB

# IOMEGA OVERVIEW

For 25 years Iomega Corporation has provided storage solutions that are innovative, yet simple, reliable and easy to use. Iomega's award winning storage products include the Iomega REV drive with removable 35GB or 70GB hard disks; desktop and portable hard drives; and floppy drives. For additional storage capacity to existing networks, Iomega StorCentre Network Hard Drives provide up to 1TB of storage space for your home or small office network and StorCentre Pro NAS Servers, designed for workstation backups/restores, file sharing e-mail storage and disaster recovery, offer capacities up to 2TB plus can be configured with REV built in.

Iomega now offers Iomega Office Screen

Managed Services for network security and remote office connectivity.

# IOMEGA REV DRIVES

## Revolutionary Removable Hard Disk Storage

**Fast** – Back up and restore up to 10 times faster than tape

**Removable and Easy** – Small form-factor 70GB & 140GB cartridges allows offsite archiving of mission-critical data

**Expandable** – Add capacity when you need it; plus no maintenance required

**Secure** – Password protected media and virtually unlimited re-writability

**Revolutionary** – Immediate disaster recovery in event of system failure

Internal – SATA & IDE

External – USB 2.0

# IOMEGA REV AUTOMATION

The Iomega REV Loader brings a complete backup solution for small and medium sized offices

**Complete** - Includes enterprise-level backup software with disaster recovery option

**Lower Total cost** - better value than comparable Tape autoloaders. No additional maintenance for cartridge cleaning, re-tensioning or media replacement required.

**Fast** - transfer speeds up to 25MB per second; back up and restore up to 10 times faster than tape.

**Efficient** - retrieve files in seconds, versus minutes, with random access (compared to linear access with tape drives)

560GB  
USB 2.0

# IOMEGA NAS UNITS

Cost-effective network storage to manage your growing data

**Iomega Network Attached Storage (NAS)** - servers increase network capacity (500GB - 2TB) enhance performance and maximize data availability.

**Reliable** - RAID data protection

**Cost-efficient** - advantageous pricing compared to general purpose servers

**Flexible** - works with Windows, Mac, and Linux/UNIX clients

250d NAS 1.TB

450r NAS 2.0TB

# IOMEGA STORCENTRE

Network file sharing made easy!

**Affordable** - Store and share files across PCs and from ANY standard or wireless computer without the cost and complexity of a server

**High-Performance** - 10/100/1000 Gigabit Ethernet

**Wireless** - 1TB model with wireless client and access point

**Flexible** - two USB host ports for added expansion and print server capability

**Accessible** - UPnP AV media server capability to stream photos, videos and music

150d - 1.0TB StorCentre

# IOMEGA HARD DRIVES

Value Series - the affordable way to add storage

**Sleek design** - Redesigned with new silver ID - looks great on any home or office desktop

**Easy to use** - Pre-formatted for simple setup, just plug and play

**Flexible** - add extra memory hassle-free

**Versatile** - new design sits horizontally or vertically to maximise your desktop space

*Professional series with RAID technology and back up software also available...*

500GB Value series

1TB Value series

# IOMEGA HARD DRIVES

Specially designed for Mac users - high capacity storage to manage, organise, and protect your most data-intensive projects

**Expandable** - Iomega UltraMax & MiniMax include more connection capabilities with three FireWire ports and a three-port USB integrated hub

**Stackable** - Stackable design allows for stacking of additional hard drives for even greater capacity (Iomega UltraMax & MiniMax)

**Compact & Durable** - The portable Dual (USB & FireWire) model fits on your shirt pocket, is USB powered and includes drop shock

**Secure** - Professional-level backup & disaster recovery for all your critical data with EMC Retrospect Express software (PC/Mac)

500GB MiniMax

1.0TB UltraMax

# IOMEGA PORTABLE DRIVES

Portable Hard Drives - take files and applications anywhere

**Easy-to-use** - The pocket-sized USB powered Portable Hard Drive requires no external power supply - just plug it in and go

**Versatile** - Available in 2.5" & 1" formats, it is a true travel companion that lets you take your important files and music anywhere

**Secure** - 2.5" model comes complete with professional-level backup and disaster recovery software

160GB PORTABLE USB &  
FIREWIRE

250GB USB EGO  
PORTABLE

250GB USB EGO Portable

120GB USB Portable

# IOMEGA SCREENPLAY

The ultimate companion to your TV Set

**Easy** - Plugs into any AV receiver, select songs, pictures and videos from on-screen menus with the easy-to-use remote control

**Versatile** - Supports all standard video and Audio Formats

**Movies/Videos** - Watch movies or videos on any TV with friends and family or when travelling

**Music** - Enjoy your digital music collection through your TV speaker or audio system

**Photos** - Display slideshows of your favourite digital photos on your TV

Allows you to easily play stored movies or music and view digital photos directly on your television without being connected to a computer.

# PLASMON OVERVIEW

Professional Archival Storage UDO™ (Ultra Density Optical) technology lies at the heart of all of Plasmon's archival solutions. It's the first storage technology specifically designed for professional and legal data archive requirements. UDO provides absolute data authenticity for regulatory compliance or for any application where archived information must remain intact and permanently unchanged.

UDO archive solutions are used by thousands of organizations worldwide across a wide variety of markets and applications, including medical, financial, government, broadcast and entertainment. They are available in a complete range of configurations to meet the archive requirements of small businesses to Fortune 500 corporations and government agencies.

# PLASMON UDO

**Permanence and Longevity** - UDO media have a 50+ year life minimizing data migrations, virtually eliminating media maintenance, and lowering costs. UDO technology is designed for the future with a roadmap that includes 120GB and 240GB media capacities.

**Authenticity** - True hardware WORM (Write Once Read Many) media provides unmatched data authenticity and allows you to easily comply with industry and governmental regulations.

**Security** - UDO2 drives include embedded AES-256 encryption technology to help you avoid embarrassing and costly data security breaches. Secure, removable media give you a cost-effective disaster recovery strategy.

**Access** - Fast, random access facilitates timely retrieval of data for legal discovery. Drives are backward read compatible to ensure long-term data access and investment protection.

**Low Total Cost of Ownership** - Environmentally friendly solutions with significantly lower costs for power, cooling and maintenance. Unmatched scalability and flexibility to grow over time without disruption. Low hardware and software acquisition costs.

# THE UDO FAMILY

Datashuttle offers both internal drives for use in automated libraries, and stand-alone Desktop drives for small businesses and individual departments. Both models are available in first generation 30GB UDO1 and second generation 60GB UDO2 configurations with application software.
