Network Softwares
Network Monitoring and Searching Softwares

T E C H N O L O G Y
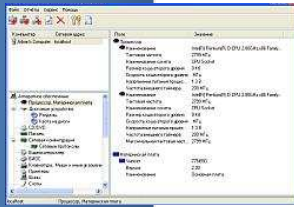

Network Inventory Explorer

Create and maintain the inventory database of network computers. View hardware and software on network computers remotely, track hardware and software changes. Create reports on the availability of particular programs and number of copies installed on computers. Create reports on versions of operating system, installed updates and bug-fixes, codecs, etc. Plan upgrades, generate reports on computers with insufficient RAM size or disk space.

LAN State

LAN State is a visual network map with monitoring functionality which allows you to see your network's state at any time. LAN State monitors hosts, shared resources, traffic, and notifies you on miscellaneous events. It contains many useful tools for administrators and users such as sending messages, shutting down and turning on remote computers, scanning hosts and ports, ping, name lookup, getting information on remote computers, etc.
Build network diagram in automatic mode and export it to Microsoft Visio.
Access actual network map via web interface from remote computers.
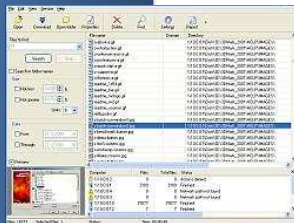

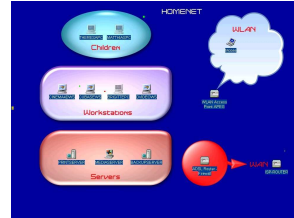

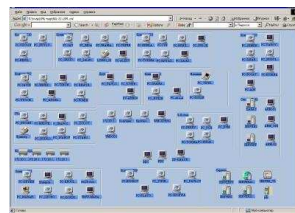

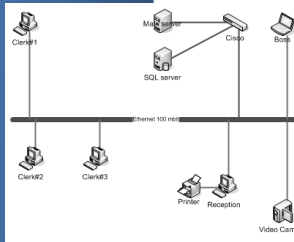

Network File Search

Search files on network computers' shared resources (via the NetBios and FTP protocols). Enter the search phrase or file masks and find the necessary information. View search results and open found files directly from the remote computers or copy the files to your hard drive. The program uses fast scanning engine and can generate handy reports on search results.
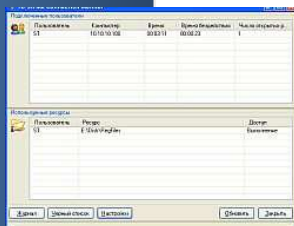

Connection Monitor

Monitor connections to your shared resources. Find out who opened your files and when. The program notifies you on incoming connections and writes all remote user's activity to log files.
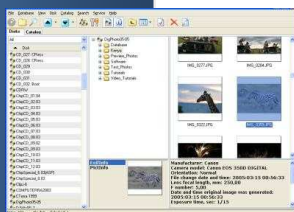

Search My Discs

Search files on CD or DVD disks fast and easily with this disk catalog. Search My Discs helps you organize and maintain databases of CD and DVD disks, and other file resources, so you can find disk with needed files in seconds. If you are tired of having to searching through hundreds of disks every time you need some information - this program is for you!
